

# Rain Dance

## Purpose

To encourage movement and expression.

## Steps

1. Place students in groups of four.
2. As a class brainstorm a list of all the different types of weather you can think of.
3. Each group will choose four different types of weather to act out.
4. One at a time, each group should come to the front of the class and do an interpretive dance for each type of weather they choose.
5. The performing group should do their dances silently as the rest of the class tries to guess which types of weather the group has chosen.
6. Take turns so that every group has a chance to perform.

### Materials

none

## Helpful Hints

Perform one interpretive dance yourself to give the class an example of the task at hand.
