

The door adventure

Have you ever been on an adventure?

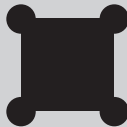

ENERGY

COMPLEXITY

GROUPING

LOCATION

Materials

- blindfold

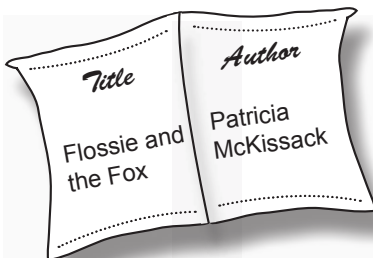

Preparing

- Invite students to stand in a circle holding hands.
- Explain that one by one, each student will pretend to be Flossie on her journey.

Doing

- Choose one student to stand in the middle, while their spot in the circle remains open and becomes a door.
- Have the students on both sides of the door hold one arm at their side.
- Blindfold the student in the center and have them spin around three times. Explain that now they will act like flossie on her adventure, except their adventure is to find their way out of the circle.
- Tell the student in the middle to feel their way to the “door”. Once outside of the circle, they can take off their blindfold and choose another player to go to the center.
